**REPORT ON CERTIFICATE COURSE ON INTERPRETATION OF ORGANIC
COMPOUNDS**

Interpretation of organic compounds is one of the most essential parameter in drug discovery. The chemical and spectroscopic methods help to elucidate the structure of the unknown natural/synthetic organic compound.

30 Hours certificate program on interpretation of organic compounds was organized from 13-02-2023 to 02-03-2023. The inaugural Session was held on 13-02-2023 and valedictory on 02-03-2022.

The sessions on spectral interpretations were conducted in detail. The students were much involved into various structure elucidation sessions and the objective of the programme was satisfactory.

Students were satisfactory and expressed that the program was educative, informative and it helps them in future research.

Some of the students suggested organizing few more certificate courses on clinical and pharmacology which can help them to gain knowledge in those areas.

We informed to Departmental Advisory committee that to add this course in curriculum to develop students advanced technology.

75 students of B.Pharm II year have participated in the program.
