The purpose of this module is to bridge the gap between what the students need to know before they start taking the advanced courses in the college level and what they are actually aware of from the intermediate level. It helps the students to overcome the doubts in the topics which they covered in 10+2 level.

The modules are made as interactive sessions between the students and the instructors. At the end of the discussion teacher may also take a small test to understand how much the students followed the class.

LECTURE BASED MODULES FOR BRIDGE COURSE
IN
MATHEMATICS :I-B.TECH (2022 – 23)

The purpose of this module is to bridge the gap between what the students need to know before they can start taking the advanced courses in the college level and what they are studied in 10+2 level. The bridge courses will cover typical weaknesses of students in mathematics at this level and it helps the students to learn present course subject in under graduate level.

The modules in Mathematics are prepared keeping in mind that an hour of discussion will bring all the students in the same stage such that they can cope up with the courses in their college level, that requires the concepts of different topics in Mathematics. The modules are made as interactive sessions between the students and the instructors. Furthermore, we have discussed those topics which harder to understand. At the end of the discussion teacher may also take a small test to understand how much the students followed the class.
