Guest Lecture on "Construction technologies for speedy delivery of structures" by Mr C A Prasad

Sri C A Prasad, Director, Meley Engg & Consultancy Pvt Ltd has kindly accepted to deliver a lecture on "Construction technologies for speedy delivery of structures" for III and IV year students as a Guest Faculty as a part of Smart infrEST LEAP session programme. He has 38 years of experience in Design calculations in FRP structures, Glue Laminated Timber beams, Light gauge Steel Structures, Composite structures, insulated RCC wall panels, GFRC structures etc...

Sri C A Prasad, accordingly delivered a Lecture on 27.08.2016 for III & IV Year Civil engineering students on "Construction technologies for speedy delivery of structures" for which 11 & 34 students attended the lecture respectively. In addition, all the faculty and Dean-SoE attended the Guest Lecture which was held between 2-15 to 4-15 pm. The highlights of the Guest Lecture is as follows:

- Derivation of a word Engineer... from Latin word "ingerere"
- Types of constructions... Shear wall /monolithic construction using aluminium
 - Insulated wall panel construction
 - Light gauge steel or cold formed steel construction
- Precast/prefabricated construction using concrete/steel
- Cast in-situ system
- Precast system in abroad & India
- Precast Villas and towers in Hyderabad.
- Buildings from Middle East

At the end of session, Sri C A Prasad was felicitated by the Director, Dr C V Krishna Reddy, NNRES Group of Institutions with Saluya and presented a memento and the programme was terminated with vote of thanks by Ms P Tejaswini, IV year student.
