REPORT ON “ELITE GATHERING”

GATHERING PARTICULARS

<u>Date organized</u>	<u>Venue / Organization</u>	<u>Attendees</u>
28 th August, 2026 (Friday)	S 08 (Second floor), NNRG	B. Tech. (ECE) II year, I-Sem A, B & C Section (09 students)

Purpose of Gathering:

The Department of Electronics & Communication Engineering at Nalla Narasimha Reddy Education Society's Group of Institutions, Hyderabad, in collaboration with the college management and H&S Department, organized a one-day Elite Gathering program for B. Tech II Year, I-Semester students, with participation from all sections, on Friday, 28th August 2026.

The program focused on the theme:

“Think Before You Click” or “Can Innovation Save the Earth”.

The digital age brings convenience but also risks such as misinformation, phishing, privacy breaches, and negative impacts on mental health. Pausing and thinking before clicking, sharing, or commenting helps protect personal information, prevent fake news, and promote a safer and more responsible digital community.

Technology can help address climate change through renewable energy, carbon capture, vertical farming, and AI-based resource management. However, technology alone is not enough. Sustainable development requires policy reforms, conservation, responsible consumption, and human responsibility alongside innovation.
