DATE 04-03-2026

TECH SAMPRATHI-2K26 REPORT

Tech & Pharma Samprathi 2026 was successfully conducted from 26th to 28th February 2026. The event brought together students from various institutions to showcase their innovative ideas, technical skills, and creative talents across multiple domains.

Day 1: 26th Feb 2026: The inaugural session commenced at 10:00 AM at the NNRG Campus in the presence of the esteemed Chief Guest, **Prof. V. Balakista Reddy Garu**, Chairman, Telangana Council of Higher Education (TGCHE), Hyderabad. The dignitaries present included **Shri Nalla Narasimha Reddy**, Chairman; **Mr. Nalla Prashanth Reddy**, Vice-Chairman; **Dr. C.V. Krishna Reddy**, Director; **Dr. G. Janardhana Raju**, Dean– School of Engineering and Convener, Tech Samprathi 2026; **Dr. Krishna Mohan Chinnala**, Dean–School of Pharmacy and Convener, Pharma Samprathi 2026 and **Dr. T. Ravindra Reddy**, Dean–School of Management. The session began with an invocation song followed by the traditional lamp-lighting ceremony. The Chief Guest addressed the gathering, emphasizing technological advancements, research innovation, and the importance of youth participation in nation-building. The inaugural session concluded with a vote of thanks.

Competitive events such as **Paper Presentation, Project Expo, Knowledge Ninjas, Tech Tombola, Technical Treasure Hunt, Tech Code storm and Tech Rangoli** commenced thereafter.

Day 2: 27th Feb 2026: The second day featured the continuation and final rounds of all events, which were conducted during the morning and afternoon sessions. Participants enthusiastically showcased their innovative ideas, research aptitude, and technical expertise. All events were successfully completed .

The Valedictory Function with the grand conclusion of Tech & Pharma Samprathi 2026. Convener of Tech-Samprathi 2k26 was given Report, Prizes and certificates were distributed to the winners by the dignitaries. The event concluded on a high note, leaving participants inspired, motivated and enriched with valuable learning experience

Project Expo

The event fostered a dynamic and collaborative learning environment, allowing students to exchange ideas, explore interdisciplinary concepts, and gain exposure to cutting-edge technologies. Participants had the opportunity to enhance their technical knowledge, problem-solving skills, and presentation abilities, which are essential for their academic and professional growth. The interactive sessions also enabled networking between students, faculty, and industry experts, paving the way for future collaborations and innovations.

Event Execution:

Round 1: Preliminary Screening

The internal preliminary screening was conducted on **25th February 2025**. This round consisted of a written test with 30 questions, including multiple-choice questions (MCQs) and fill-in-the-blank type questions. Participants were evaluated based on their technical knowledge, general awareness, engineering principles, aptitude, and current affairs. Teams that secured the highest scores successfully advanced to the next stage of the competition. Total 28 teams participated.

School of Engineering
Department of Electronics & Communication Engineering

Glimpses of Round 1

Out of 28 teams Top 15 teams were selected for Round-2

Round 2: Visual Round

The second round, known as the Visual Round, took place at **12:00 PM on 26th February 2026**. In this round, questions were displayed on a projector screen, and teams had to answer based on the visual cues provided. This round tested the analytical and observational skills of participants. Out of all the teams, the top-performing teams from this stage moved forward to the final round. Top 5 Teams selected for Final Rapid-fire Round.

School of Engineering Department of Electronics & Communication Engineering

Glimpses of Round 2

Round 3: Rapid Fire Round

The final round was conducted at 3:00 PM on 26th February 2026 and comprised a group challenge among five teams. This round was structured into five sub-rounds, each designed to evaluate different aspects of the participants' knowledge and problem-solving abilities. The teams competed in a series of challenges that assessed their academic proficiency, critical thinking, and teamwork.

Tech Tambola

The event aimed to provide participants with a fun-filled competitive atmosphere while encouraging **quick thinking, alertness, and enthusiasm**. It successfully combined entertainment with technical engagement, making it one of the most energetic events of the symposium.

Total no. of teams registered: 35

Total no. of teams participated: 35

Internal: 34

External: 1

Event Execution:

Round 1: Ticket Frenzy

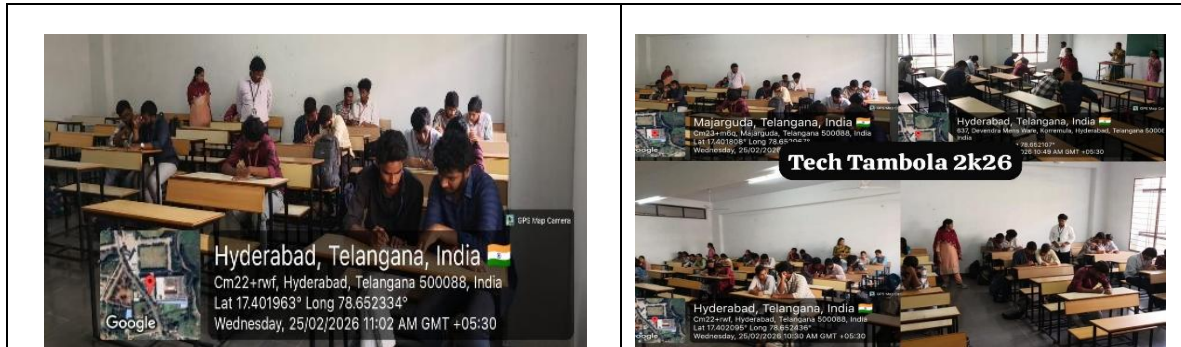

Each team was provided with a printed 25-number Tambola ticket.

1. Numbers were called rapidly along with fun, tech-themed clues (example: “89 – LED glows bright!”).
2. Participants marked numbers accordingly.
3. Scoring Pattern: +4 points for each completed line, -1 point for false claims.
4. The **Top 10 teams** with the highest verified line completions advanced to Round 2.

The preliminary round of **Tech Tambola** was conducted as the first stage of the competition. In this round, participants were provided with printed Tambola tickets containing a 90-number grid. Numbers were called rapidly along with creative tech-themed clues, and participants were required to listen carefully and mark the corresponding numbers on their tickets. Participants were evaluated based on their attentiveness, speed, and accuracy in marking the numbers and making valid claims. Points were awarded for correctly completed lines, while false claims resulted in penalty marks. Teams that achieved the highest verified scores successfully advanced to the **Final Round** of the competition.

School of Engineering Department of Electronics & Communication Engineering

Glimpses of Round 1

Round 2: Full House

1. High-speed number calling was conducted.
2. Participants competed to claim: Early Bird, Lines, Full House
3. Claims were verified with marked tickets and tokens.
4. Winners were judged based on: Speed of claim, Accuracy, Total verified lines

The final round of **Tech Tambola**, known as the **Full House Jackpot Round**, was conducted after the completion of the preliminary stage. In this round, numbers were called sequentially along with creative and engaging tech-themed clues. Participants had to carefully listen and mark the corresponding numbers on their Tambola tickets. This round tested the participants' concentration, alertness, speed, and accuracy in making valid claims. Teams competed to complete prize categories such as Early Bird, Line Winner, and Full House. Out of all the participating teams, those who made the fastest and most accurate verified claims were declared the winners of the competition.

Treasure Hunt

The event was carefully designed to blend technical knowledge with fun-filled challenges, allowing participants to apply their concepts in a dynamic and interactive manner. Through a series of clues, puzzles, and problem-solving tasks, students experienced an exciting journey across the campus while strengthening their coordination, communication, and time-management skills. The Treasure Hunt aimed to create a vibrant platform where learning meets adventure.

Total no. of teams registered: 37

Total no. of teams participated: 37

Internal: 35

External: 2

Event Execution:

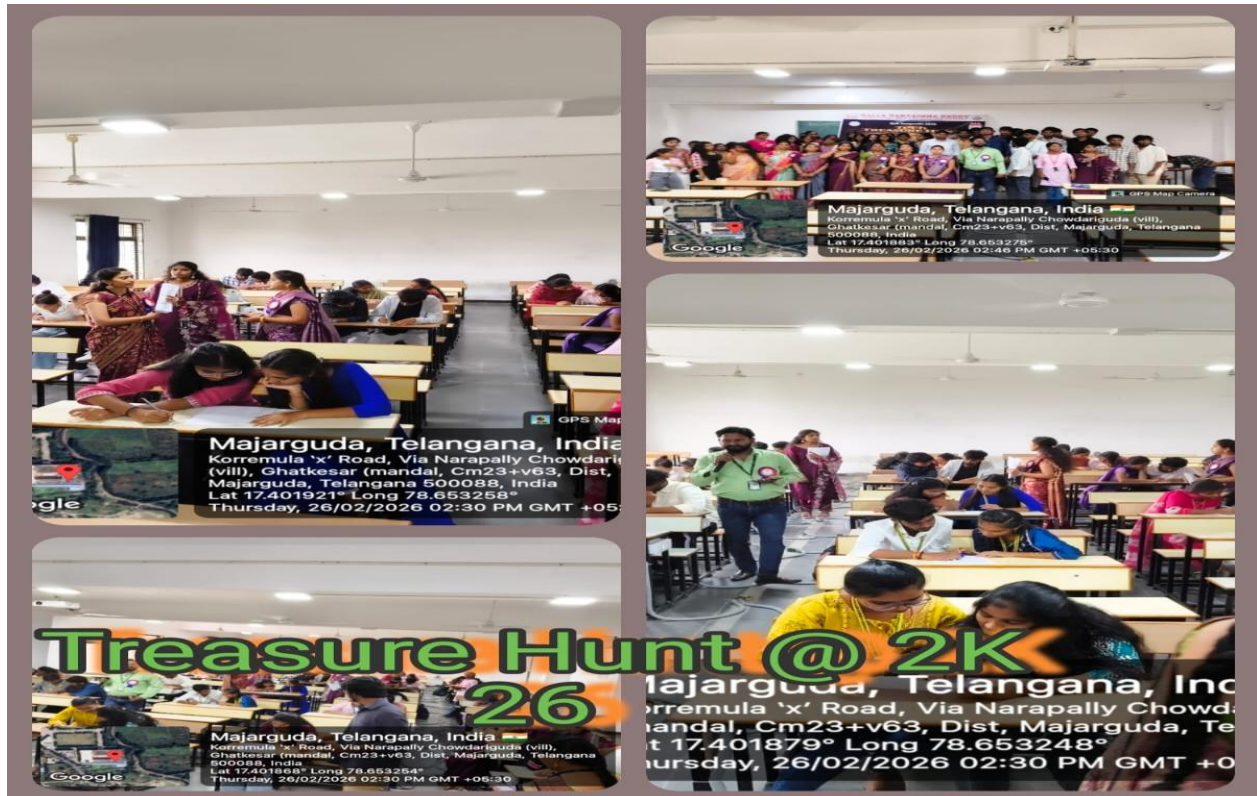

The Treasure Hunt was executed in a systematic and well-organized manner to ensure smooth coordination and active participation. Prior to the event, the organizing committee planned the levels, prepared question sets, and arranged clues in different locations across the campus. Volunteers were assigned to monitor each clue point and guide participants whenever necessary. On the day of the event, teams were assembled and briefed about the rules and regulations. Each team received the first clue at the starting point. To proceed to the next level, participants were required to correctly solve technical questions, logical puzzles, or coding problems. Upon giving the correct answer, they were provided with the next clue that directed them to a specific room or block.

The event consisted of multiple levels, increasing in difficulty at each stage to maintain excitement and competitiveness. Time management was strictly followed, and fairness was ensured throughout the event. The first team to successfully decode all clues and reach the final destination was declared the winner.

Round 1: Preliminary Screening

Round 1 of the Treasure Hunt began with a written test consisting of 10 questions. The questions were designed to assess student's logical reasoning, basic technical knowledge, aptitude, and problem-solving skills. The difficulty level was moderate so that students from all years could participate confidently. Each team was given a fixed time to complete the test. The answer sheets were evaluated immediately by the organizing committee to ensure quick progression of the event. Based on the performance in this round, the top-performing teams were shortlisted and qualified for the next stage. The selected teams were then provided with the second clue, which directed them to the next location to continue the Treasure Hunt journey. This round ensured fair selection and added excitement as teams eagerly awaited the results to advance further in the competition.

School of Engineering
Department of Electronics & Communication Engineering

Glimpses of clue 1

Clue 2:

In Clue 2, the shortlisted teams were given a basic technical or logical question to solve. The question was designed to test their fundamental knowledge and quick thinking skills. It included simple aptitude, coding output prediction, or general technical concepts that could be answered by students from any year. Upon solving the question correctly, the answer itself acted as a direction clue. The solution either indicated a specific room number, within the department where the next clue was placed. Teams had to carefully interpret the answer to identify their next destination. This round increased the excitement level as participants began moving around the campus actively in search of the next clue. It also encouraged teamwork, discussion, and effective decision-making among team members.

School of Engineering
Department of Electronics & Communication Engineering

Glimpses of clue 2

Clue 3:

Clue 3 was designed to be slightly more challenging than the previous rounds. In this stage, teams were given a technical problem, coding question, or logical puzzle that required deeper analysis and teamwork to solve. The question tested students' understanding of core engineering concepts, programming logic, or analytical reasoning. Teams were required to carefully discuss and arrive at the correct answer within the given time.

Glimpses of clue 3

Clue 4:

In this stage, the qualified teams were given a challenging question that required analytical thinking and subject knowledge. The question was designed to test their logical reasoning, technical understanding, and ability to work together under time pressure.

School of Engineering
Department of Electronics & Communication Engineering

Glimpses of clue 4

Clue 5:

In Clue 5, participants were given a mathematical problem involving the perimeter of a rectangle. After finding the answer, they followed the instruction to decode the next room number. This round tested their understanding of basic mathematics and careful interpretation of instructions. The clue required both calculation accuracy and logical thinking to proceed further.

Glimpses of clue 5

School of Engineering Department of Electronics & Communication Engineering

Clue 6:

This clue consisted of two technical questions involving binary addition and a programming concept. Participants first converted the binary addition result into decimal form and then determined the output of a modulus operator in C programming.

Glimpses of clue 6

Clue 7:

This clue focused on logical pattern recognition. Teams carefully analyzed the number series to determine the mathematical relationship. Once identified, the answer directly revealed the next room number. The hunt became more dynamic as teams moved across campus.

Glimpses of clue 7

School of Engineering Department of Electronics & Communication Engineering

Clue: 8

The final clue presented participants with a classic logical puzzle involving 5L and 3L containers, challenging them to measure exactly 4 liters. Teams applied step-by-step reasoning by filling, transferring, and emptying the containers strategically to arrive at the correct measurement. This activity tested logical sequencing, patience, and analytical thinking skills.

Tech Rangoli

Rangoli has always been a symbol of tradition, positivity, and expression. But in today's modern world, creativity is not limited to colors and patterns alone—it extends to **innovation, engineering concepts, and scientific ideas**. This event is a unique platform where participants showcase their technical knowledge through artistic designs. In this competition, you will witness rangoli designs inspired by **electronics, circuits, communication systems, AI, robotics, VLSI layouts, and many more engineering concepts**. It is not just about aesthetics, but also about **how effectively technical themes are represented visually**.

		P. Chandra Kiran	257z5A0417	II/C	NNRG
		Ch. Srihari	257z5A0406	II/C	NNRG

Event Execution:

The Technical Rangoli Event was conducted in a well-organized and systematic manner to ensure smooth participation and fair evaluation. A designated outdoor space was allocated for all registered teams. Each team was provided with an equal area to create their rangoli based on the chosen technical theme. Participants were given a total duration of **2 hours** to complete their rangoli designs using colors and other permitted materials. Event coordinators supervised the activity to ensure adherence to rules, time management, and proper use of the allotted space. After the completion of the allotted time, **a panel of five judges from various departments** was invited to evaluate the rangoli designs. The evaluation was carried out based on predefined criteria such as:

- Technical concept and relevance
- Creativity and innovation
- Design clarity and neatness
- Color combination and visual appeal
- Overall presentation and explanation

Each judge independently assigned marks to all the teams. The final score for each team was calculated by taking the **average of the marks given by all five judges** to ensure fairness and transparency in evaluation.
