

SCHOOL OF PHARMACY

Report on

MSME AND INNOVATION IDEA

The seminar was organized collaboratively by the School of Pharmacy and the School of Engineering, to foster interdisciplinary knowledge and promote innovative thinking among the students.

1. Innovation in Pharmaceutical Sciences:

- Exploration of innovative approaches in pharmaceutical research and development.
- Integration of engineering principles in drug design and delivery.
- Case studies highlighting successful innovations in the pharmaceutical industry.

2. Interactive Sessions:

- Q&A sessions to address students' queries on MSME and pharmaceutical innovations.
- Group discussions to encourage collaboration and idea-sharing among students.

3. Ideation Workshop:

- Facilitated brainstorming sessions for students to generate innovative ideas at the intersection of pharmacy and engineering.
- Encouragement of cross-disciplinary collaboration for potential research projects.

4. Closing Remarks:

- Acknowledgment of the importance of interdisciplinary knowledge.
- Emphasis on the role of innovation in both space exploration and pharmaceutical sciences.
- Expression of gratitude to the guest speakers and participants.

The seminar received positive feedback from the participants, with students expressing increased interest in the convergence of pharmacy and engineering disciplines. The ideation workshop generated several innovative ideas, which can potentially be developed into collaborative research projects. Recommendations for Future Initiatives:

1. Continued Collaboration:

- Encourage ongoing collaboration between the School of Pharmacy and the School of Engineering for interdisciplinary seminars and workshops.

2.Research Opportunities:

- Explore opportunities for joint research projects that leverage the expertise of both schools.

3.Industry Partnerships:

- Foster partnerships with industry experts to provide students with real-world insights and potential internship opportunities.

4.Regular Seminars:

- Organize regular seminars on emerging technologies and innovative trends to keep students abreast of the latest developments.

In conclusion, the MSME and Innovation Ideas seminar proved to be a successful initiative in promoting interdisciplinary knowledge and inspiring innovative thinking among B. Pharmacy students.

Faculty, Staff, and female students of B. Pharmacy I year (90) have participated in the program
