REPORT ON

INDSUTRIAL VISIT TO STRIDE ORGANICS - 2026

Location: Industrial Visit to Stride Organics, Kondapur, Ghatkesar

Date of Visit: 09 October 2026
Class: B.Pharmacy IV Year – Section A
Total Students: 46

Faculty Coordinators:

- Dr. B. Madhavi Latha, Associate Professor
- Dr. N. Swapna, Associate Professor

Introduction

NNRG School of Pharmacy conducted an industrial visit to Stride Organics, Kondapur, Ghatkesar, on 09 October 2026 for the B.Pharmacy IV Year, Section A students. A total of 46 students participated in this academic activity under the supervision of **Dr. B. Madhavi Latha** and **Dr. N. Swapna,** Associate Professors.

The visit was organized to familiarize students with industrial manufacturing operations and provide firsthand exposure to the equipment, production facilities, and practices followed in an industrial setting.

Objectives of the Visit

- To introduce students to the layout and functioning of industrial manufacturing units.
- To provide practical exposure to equipment and machinery used in manufacturing processes.
- To improve students' understanding of production operations and process monitoring.
- To emphasize the importance of safety, hygiene, quality control, and standard operating procedures.
- To help students understand the relationship between academic knowledge and industrial applications.

Activities and Observations

During the industrial visit, students observed the manufacturing facilities and gained exposure to various types of industrial equipment. They developed a better understanding of how equipment and machinery contribute to efficient manufacturing operations.

The visit offered an opportunity to learn about operational procedures, equipment utilization, process monitoring, and the importance of maintaining quality and safety standards. The faculty coordinators guided the students throughout the visit and encouraged them to relate their classroom learning to the practical aspects of industrial operations.

Learning Outcomes

The visit enabled students to:

1. Understand the working environment of an industrial manufacturing facility.
2. Gain practical exposure to industrial equipment and manufacturing units.
3. Appreciate the importance of process control and quality assurance.
4. Recognize the significance of safety measures, hygiene, and good manufacturing practices.
5. Develop greater awareness of industrial expectations and future career opportunities.

Conclusion

The industrial visit to Stride Organics was a meaningful learning experience for the 46 B.Pharmacy IV Year, Section A students of NNRG School of Pharmacy. The exposure to industrial equipment and manufacturing facilities helped students strengthen their practical understanding and appreciate the importance of industrial operations in their professional education.

The visit was conducted under the guidance of Dr. B. Madhavi Latha and Dr. N. Swapna, Associate Professors, and contributed to enhancing students' technical awareness and readiness for future careers in the pharmaceutical industry.
