## SESSION: III

The image shows a Zoom meeting interface. The main window displays a presentation slide with a portrait of Dr. Chellapilla Kameswara Rao and a painting of a deity playing a veena. The slide title is "Artificial Intelligence-Assisted Online Education" and identifies him as "Ex-Senior DGM, BHEL (R&D)". A smaller video window shows the speaker, Dr. Chellapilla Kameswara Rao, wearing a yellow shirt. The participant list on the right shows 29 participants, including Aravinda Nalla (Me), NNRG (Host), DELL, Aruna paladi, Ashwini Jeddiga, B. SAI VENKATA KRISHNA, Baba Naseeruddin, D. Sireesha, Deepika B, Dr BCP, Dr Sucharitha, Dr. K. Thirupathi, Dr. P. Prabhakar Reddy, and Dr. T. Ratna Reddy. The system tray at the bottom shows the time as 10:24 AM on 9/29/2020.

**Artificial Intelligence-Assisted Online Education**  
**Dr. Chellapilla Kameswara Rao**  
**Ex-Senior DGM, BHEL (R&D)**

**Google Search Needs to be Officially Taught to all the Students**

- Google hacking [5,6,7] or 'advanced search' is a very intensive and intelligent activity of retrieving related documents for study or research projects on hand.
- Lot of patience and crazy love, towards locating and downloading all relevant material available on the internet, is required in this effort to complete the task without missing even one related one.
- That is the reason why this google searching becomes a real art and hence, it is not surprising that many people fail to succeed with complete satisfaction in this important activity related to 'Literature Search'.
- Many a time, the searcher has to even go to the extent of browsing the 30<sup>th</sup> page of the google search result pages in the process.
- Also, no judgement should be applied while plucking all the fruits from the garden onto the mat on the floor.
- Segregation of these downloads into most relevant, distantly related and unrelated should be done only after a close and critical look at all these items.
