

NALLA NARASIMHA REDDY
Education Society's Group of Institutions - Integrated Campus
(UGC AUTONOMOUS INSTITUTION)

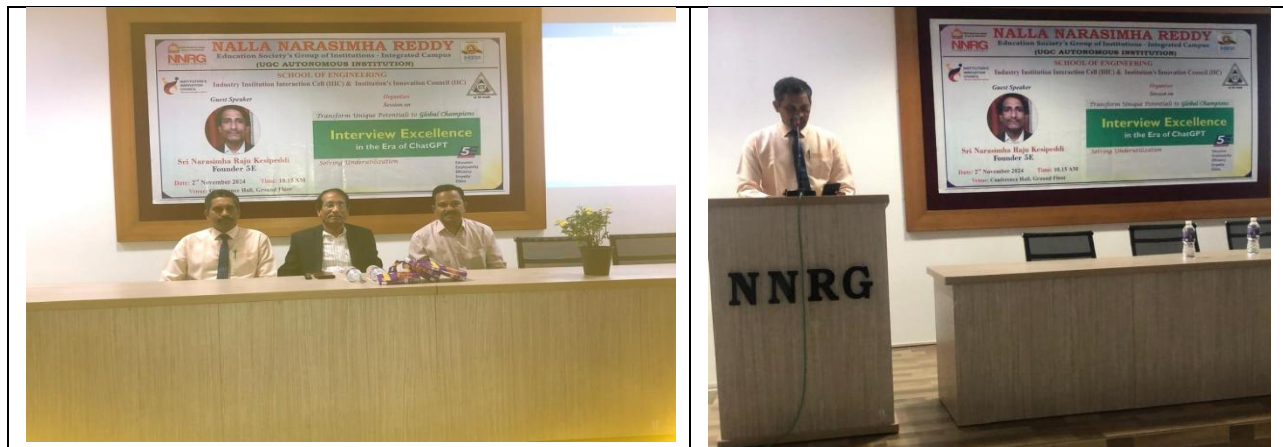

Industry Institute Interaction (IIC) and Institution's Innovation Council (IIC)

Date: 02-11-2024

A report on "Interview Excellence in the Era of ChatGPT"

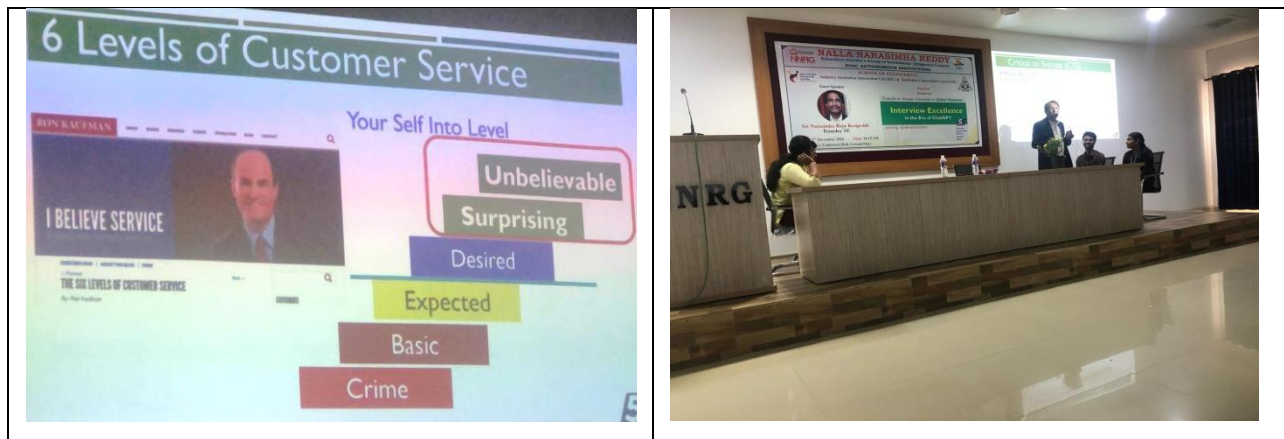

The poster features the NNRG logo on the top left and the Institution's Innovation Council logo on the top right. The main title is "NALLA NARASIMHA REDDY Education Society's Group of Institutions - Integrated Campus (UGC AUTONOMOUS INSTITUTION)". Below this, it says "SCHOOL OF ENGINEERING Industry Institution Interaction Cell (IIC) & Institution's Innovation Council (IIC)". The guest speaker is Sri Narasimha Raju Kesipeddi, Founder 5E. The session is organized on "Transform Unique Potentials to Global Champions" and focuses on "Interview Excellence in the Era of ChatGPT" with the theme "Solving Underutilization". The 5E logo is also present, with sub-points: Education, Employability, Efficiency, Empathy, and Ethics. The date is 2nd November 2024, time is 10.15 AM, and the venue is Conference Hall, Ground Floor. The IETE logo is on the right side.

Industry Institution Interaction Cell (IIC) and Institution's Innovation Council (IIC) organized a session on "Interview Excellence in the Era of ChatGPT" on 02-11-2024 by inviting Sri Narasimha Raju Kesipeddi, Founder 5E. Around 145 B. Tech ECE & CSE students and 6 Faculty members attended the session.

Sri Narasimha Raju enlightened 5E of Education, Employability, Efficiency, Empathy and Ethics. Also pointed on **“CRITICAL to SUCCESS”** which is a part of a Project Plan. CTS means Conceptual Understanding which is achieved by implementing Static variable in C Language in terms of approach. Static variable retains its value between function calls, need a variable to persist throughout the program’s execution or values that track state within a function. Hence, static variable in C Language achieved by storing it in data segment of memory similar to a Global variable, unlike a local variable, which is stored in the stack segment. In addition, he commented on Global variables, C++ purpose, Memory map in a C program, etc..

Detailed explanation has been given on levels of customer services. Sri Narasimha Raju invited a few students those who have stage fear and asked them to play a skit to get rid off stage fear.

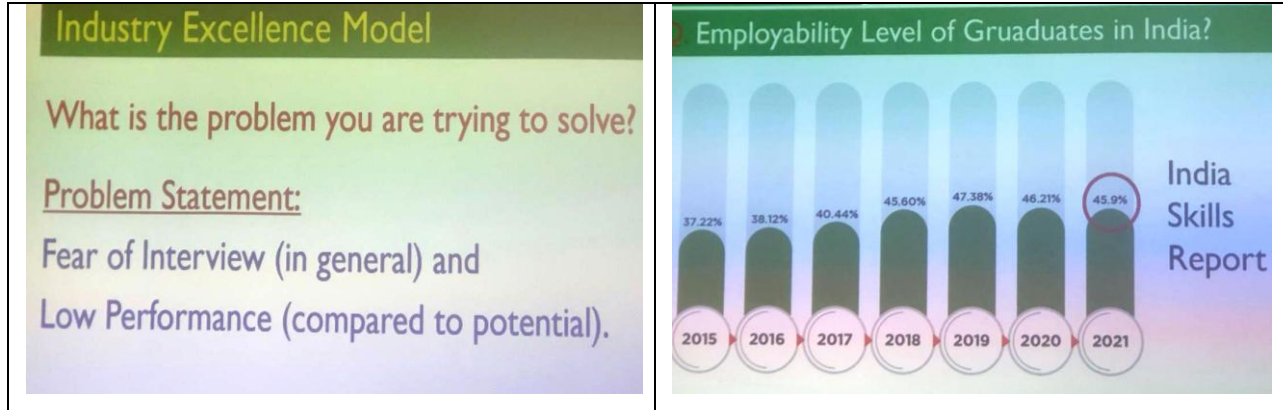

While addressing the participants, Mr Narasimha Raju asked about their talent levels. Majority of the students answered that we are average talented while a few said we are highly talented. However, a few raised their hands and said we are poor talented. In this regard, the speaker motivated all the students stating that everyone is super talented.

Faculty and student participants in the session of Interview Excellence

He briefed about Industry Excellence Model covering fear of interview and low performance and employability level of Graduates in India. He pointed that the employability level of graduates has gradually increased from 45.9% to 51.25% by 2024.

The session is concluded at 12:40 PM with a couple of comments and interactions.
